TRACECARBON / AXIOMX

SUPPLIER ANNUAL ACTIVITY DATA STATEMENT

Supporting record for supplier spreadsheet upload and auditor-review workflow

SYNTHETIC DEMONSTRATION EVIDENCE - NOT AN ACTUAL COMPANY DISCLOSURE
Prepared for TraceCarbon prototype testing. This is a generated summary of workbook data, not a utility bill, fuel invoice, statutory filing, supplier-signed declaration, audit certificate or independently verified evidence.

1. Supplier and reporting details

Supplier ID	SUP-003	**Industry**	Aluminium
Supplier name	AxiomX Aluminium Suppliers	**Main product**	Aluminium ingots
Reporting period	FY2023-24	**Scope 3 category**	Category 1 - Purchased Goods and Services
Period start	01 April 2023	**Period end**	31 March 2024
Operational location	Renukoot Smelter Complex, Uttar Pradesh	**Contact listed in source**	Amitabh Sengupta (Works Director)

2. Annual industrial activity data

The following values are transcribed from the import-ready workbook used for the TraceCarbon supplier upload. The reported period and units are retained.

Activity parameter	Reported value	Unit	Source note
Electricity consumption	53,680,000	kWh	Present in source workbook
Diesel consumption	225,000	litres	Present in source workbook
Production output	27,500	tonnes	Present in source workbook
Raw material consumption	29,700	tonnes	Present in source workbook

3. Source and preparation record

Original source file	AxiomX_Aluminium_FY2023-24(1).xlsx
Original source sheet	Annual_Activity
Import-ready workbook	AxiomX_Aluminium_FY2023-24_Prototype_Import_Ready.xlsx
Preparation note	All four activity fields are present in the source workbook. The import-ready workbook standardizes the headers and places the four values in a single data row.

4. Data classification and limitations

• The four activity values and their units match the corresponding activity rows in the source workbook and the standardized import-ready workbook.

• The source workbook labels the values as synthetic demonstration data. Its “Verified Preload” field is reproduced as a source-workbook label only; it does not indicate independent audit or third-party verification.

Use limitation: These synthetic values are for demonstrating spreadsheet ingestion, activity-data review and evidence attachment in TraceCarbon. They must not be represented as actual operational measurements, supplier declarations or real-world emissions disclosures. No emissions calculation or independent assurance is included in this statement.
