TraceCarbon

SUPPLIER ENERGY & PRODUCTION STATEMENT

SYNTHETIC DEMONSTRATION EVIDENCE — NOT AN ACTUAL COMPANY DISCLOSURE. This document was prepared solely for software demonstration and workflow testing. It is not a utility bill, regulatory filing, audit certificate, or independently verified evidence.

1. Supplier and reporting details

Supplier ID	SUP-003	**Supplier**	AxiomX Aluminium Suppliers
Industry	Aluminium	**Main product**	Aluminium ingots
Reporting period	FY2023–24	**Scope 3 category**	Category 1 — Purchased Goods and Services
Period start	01 April 2023	**Period end**	31 March 2024
Operational location	Renukoot Smelter Complex, Uttar Pradesh	**Contact listed in source**	Amitabh Sengupta (Works Director)

2. Annual industrial activity data

The values below are transcribed from the supplied workbook **AxiomX_Aluminium_FY2023-24.xlsx**. Units and reporting period are preserved as recorded.

Activity parameter	Reported value	Unit	Reporting period
Electricity consumption	53,680,000	kWh	FY2023–24
Diesel consumption	225,000	Litres	FY2023–24
Production output	27,500	Tonnes	FY2023–24
Raw material consumption	29,700	Tonnes	FY2023–24

3. Data classification and limitations

The source workbook labels each activity value as **Synthetic Demonstration Data** and records the status as **Verified Preload**. In this demonstration document, that status is reproduced as a source-workbook field only; it does not mean that an independent auditor or external party verified the figures.

These figures are provided for testing the TraceCarbon supplier submission, evidence attachment, and auditor review workflow. They must not be represented as actual operational measurements or used as a real-world emissions disclosure.

4. Source and preparation note

Source file: AxiomX_Aluminium_FY2023-24.xlsx (sheet: Annual_Activity). This statement mirrors the supplier identifiers, reporting dates, activity values, and units present in that workbook. No additional activity figures or emissions calculations have been introduced.

Prepared for TraceCarbon demonstration use • Trace. Measure. Improve.
